ETC LB 15/200 Loadbreak Elbow Connector

For 15kV, 200A

ETC LB 15/200 Loadbreak Elbow Connector

General:

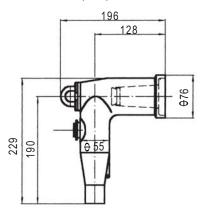

The ETC LB 15/200 Loadbreak Elbow connector is a fully-shielded and insulated plug-in termination, rated 200 amps, 15kV, connected with underground cable ranging from 25 to 120 mm² (conductor cross section). It's loadbreak probe with an ablative arc-follower tip provides dependable loadbreak switching characteristics.

The ETC LB 15/200 Loadbreak Elbows are molded using high quality peroxide-cured EPDM insulation. It is used to connect underground cable to transformers, switchgear and 200 amp junctions equipped with loadbreak bushings. The test point is available for use with hot line voltage indicators.
